Hey @jimmaitelle, thanks for the review. It's good to see (and read) that you like the new features!

I'm glad you mentioned Photoshop CC on the iPad in your review. We're excited to bring Photoshop CC's features to the iPad Pro. I'm glad you liked the new brand new version and have found it easy to take to the iPad. Of course, we know how much work and devotion you've given to art and so much good work is possible right from your PC/Mac.

Let us know if you have any questions about what's new in 5.5, next steps for the development roadmap, and our other CC Creative Cloud plans. Looks great. So far, I have been able to go months without touching PS, and this latest release looks slick. Good job.

Oh, and keep up the great work product-wise.

Keep it up guys. Don't let the market folks push you out and I will be one of those folks that keep buying.

Best,

Brian Update management worked pretty well, although I did encounter some problems.

Lightroom's update check will uncheck itself if you do an update; you must tell it to check again if you want to complete the update itself. I didn't have any problems with it going off-line in the middle of an upgrade, but I heard about people having that problem. Dropbox seems to be still the recommended method, and it's still the best in most ways. One advantage of Dropbox is that you can configure Lightroom to only download updates on weekends. This can assist you if you like to leave Lightroom to work on photos on its own and somehow forget to set the update schedule to weekends, for example. A question I never heard from anyone before upgrading to Lightroom 5 was: how long will Designer's Library updates take?

More importantly, Lightroom 5 has improved since last year, and I've been quite happy with it now. Lightroom is an increasingly versatile tool. I can begin to learn to like it, which I never thought I'd be able to do.
